ACADEMIC PROJECTS

Job Portal System
- Developed a full-stack job portal using the MERN Stack with RESTful APIs for job postings, applications, and user authentication; built responsive UI in React.js with Bootstrap.

Student CRUD Application (Hibernate & JPA)
- Developed a Hibernate-based Java application to perform CRUD (Create, Read, Update, Delete) operations on a Student entity using JPA annotations, implementing object-relational mapping between Java classes and relational database tables.

Library Management System
- Built a full-stack library management system using React.js, Node.js, and Express.js with MongoDB, featuring RESTful APIs to automate issue/return workflows.

Chat Sphere
- Built a real-time chat application using the MERN Stack with secure user authentication and RESTful backend services for live messaging.

Donation Platform System
- Built a full-stack donation platform using the MERN Stack with RESTful APIs and MongoDB schemas for donation listing, tracking, and management.
